

Thematic Areas

This sections introduces the work on a number of selected Thematic Areas of European interest identified on the basis of priority and convenience of participants.

Core Group Members are organized in Operative Teams (study/working groups) which go in deep in each area following a shared scheme and list of priorities.

Participate to an Operative Team on a specific Thematic Area means sharing your institution vision, approach, competences, expertise, courses curricula,... on that topic with other Operative Team participants, in order to identify and build up, for example, Excellence Curricula or Procedural and Organizational Guidelines taking into account the inputs from each participant.

- **Training Programme and Community Mechanism (with particular emphasis on the international assistance)**
- **International Assistance**
- **E-Learning**
- **Training on Prevention**
- **Training on Information to the population**
- **Training for Volunteers**
